

Let us Introduce Ourselves!

The United Technical Center School of Practical Nursing is operated by the administrative council of Doddridge, Harrison, and Taylor counties as a postsecondary program. The course is sponsored by the State Bureau of Vocational, Technical, & Adult Education and is accredited by the West Virginia State Board of Examiners for Licensed Practical Nurses and the Commission of the Council of Occupational Education.

Practical Nursing offers a variety of attractive career opportunities. Students are prepared to hold positions in nursing homes, doctor's offices, hospitals, home health, and penal institutions. The role of the LPN includes giving direct bedside care, administering medications and treatments, reporting and recording client responses, and working in a team relationship with registered nurses, physicians, and others. Graduation from the program qualifies the student to take the national licensing examination (NCLEX-PN).

The cost of tuition is \$4500 for the year. Uniforms, books, NCLEX test, physical exam, etc. are an additional \$3325.00, PELL Grants and other financial aid and the refund policy is available upon request. See the Financial Disclosure Statement on the website.

"Our Philosophy"

The faculty believes in the inherent value of the person. We view the person as unique with physical, spiritual, psychological, and physiological needs.

The nurse's role is to assist the person with health needs. These needs include the promotion of wellness, administration of care during illness or injury, rehabilitation from disability, and support of end of life with dignity.

Practical nursing is an essential part of nursing and contributes significantly to the health care of persons. The practical nurse utilizes the nursing process to render safe and effective care under the supervision of qualified nursing or medical personnel.

Nursing education's primary goal is the development of a practical nurse with a strong theoretical base, clinical skills, and clinical judgment. The student must assume the active role of learner.

Faculty keeps abreast of changing health care trends, information, treatments, and nursing care in order to provide state of the art education.

Graduates are encouraged to continue learning after graduation as they strive for continued excellence in their profession and in order to meet licensure renewal requirements.
